

Workplace Safety

ON-SITE TRAINING

Bloodborne Pathogens; Fire Safety; EAP; Fire Extinguishers

This combined training provides essential knowledge on recognizing, evaluating, and controlling potential exposure to bloodborne pathogens, including OSHA regulations, transmission modes, and steps to take in case of exposure. Additionally, it covers fire safety fundamentals, including the fire tetrahedron, fire classifications, and the proper use of portable fire extinguishers using the PASS method. Finally, the session will discuss the organization's Emergency Action Plan (EAP).

Agenda

Bloodborne Pathogens

- OSHA Regulations and DLS enforcement
- Key terminology, types of bloodborne pathogens
- Transmission modes and control methods
- Exposure steps and control plan

Fire Safety & Fire Extinguishers

- Fire Tetrahedron, classifications of fire, extinguisher types
- Prevention vs. protection and flight or fight response
- Extinguisher use (PASS method)
- Equipment selection and useful resources

Accommodations Please contact Lauren Stratton at 423-302-7787 at least 48 hours in advance.
