MIIA Risk Management Training

Workplace Safety

MIIA OSHA Bloodborne Pathogens (BBP) Exposure Control Plan Administrative Training

This two-part interactive training is designed for health inspectors, sanitarians, and directors of public health overseeing municipal BBP compliance.

Part 1 is a facilitated work session covering the administrative requirements of implementing and maintaining an Exposure Control Plan (ECP) using templates from the Massachusetts Department of Labor Standards (DLS).

Part 2 shifts to an interactive discussion of related work practices and tools, challenges faced across municipal departments, and opportunities for interdepartmental coordination.

What the Two Sessions Cover:

Part 1: Core Administrative Requirements

Under OSHA's BBP Standard (29 CFR 1910.1030(c)(1)), any employer with employees who face reasonably anticipated contact with blood or other potentially infectious materials (OPIM) (e.g., clinical services, EMS/fire, law enforcement, sanitation, parks, custodial operations, wastewater treatment) must implement an ECP that is written and site-specific covering the following elements:

1. Exposure Determination
2. Methods of Implementation (Universal/Standard Precautions, Engineering and Work Practice Controls, Personal Protective Equipment (PPE), Facility/Vehicle Decontamination)
3. Hepatitis B Vaccination
4. Post-Exposure Evaluation and Follow-up
5. Communication and Training
6. Recordkeeping, Annual Review, Employee Access

Part 2: Field Work Practices and Municipal Coordination:

DATE & TIME

December 15, 2026

1:00 p.m.- 3:00 p.m.

PRESENTER

Lynn Rose

Lynn is the Senior Risk Management Trainer for the Massachusetts Interlocal Insurance Association (MIIA).

With over 30 years of experience across K-12 school and municipal departments, she specializes in developing and implementing comprehensive Environmental Health and Safety (EHS) systems.

She collaborates closely with regulatory agencies and professional associations to deliver targeted training programs, compliance tools, and guidance documents that meet local, state, and federal requirements. Beyond assisting with compliance, she also champions proactive, non-regulatory health and safety initiatives.

.

1. Work Practices, Supplies, Tools: Blood spill clean-up and used syringe pick-up
2. Departmental Challenges: Addressing operational issues across diverse municipal roles.
3. Interdepartmental Coordination: Exploring shared response protocols, vendor contracts, and supplies for used syringe pick-up and disposal, and biohazardous waste disposal.

Reward Credits This training qualifies the MIIA member for .5% under the MIIA Rewards Workers Compensation Category

Accommodations Please contact us at least 48 hours in advance.
