**All participants are required to submit an OSHA Training Institute Education Center Registration form to attend this training**

All OSHA Courses conducted by the OSHA Education Center are approved for Training Contact Hours (TCH) by the Board of Certification (MA DEP)

---

**Course Description:** - This one-day course is designed as a training program to inform employers and employees of the best practices in trenching and excavation safety. The participant will learn about the role and responsibility of the employer to assign a “competent person” to the excavation site and provide that person with the knowledge of key excavation hazards. Topics include: understanding and application of definitions related to OSHA’s excavation standard; excavation hazards and control measures; soil analysis techniques; protection system requirements, and emergency response. The program is a facilitated interactive session.

**Who should attend:** Safety Officers, Town Managers, and Department Heads or individuals designated with the responsibility to develop and maintain a safety and health program or system. This training is suitable for safety leaders, committee members, HR and safety professionals responsible for improving the safety and health culture and best practices in their workplace.

Attendance at this seminar qualifies the MIIA member for 1% credit under the FY20 MIIA Rewards Workers' Compensation category
