

## Bloodborne Pathogens Training

Thursday, November 9, 2023

Emergency Operations Center, 2209 State Road, Plymouth, MA 02360

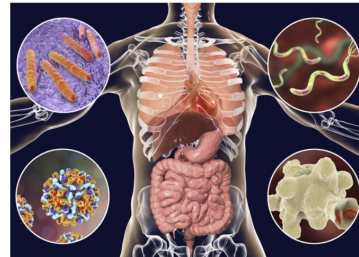

12:00 p.m.- 3:00 p.m.

[Register here](#)

Bloodborne pathogens are infectious microorganisms present in blood or potentially other bodily fluids that can cause disease/s in humans. These pathogens include, but are not limited to, hepatitis B virus (HBV), hepatitis C virus (HCV), and human immunodeficiency virus (HIV). These pathogens can expose workers to serious or life-threatening illnesses. This session will address the knowledge needed to recognize, evaluate, and control the potential exposures to bloodborne pathogens.

### TOPICS of DISCUSSION

- Bloodborne pathogen vocabulary
- Elements of a BBP Exposure Control Plan
- Types of bloodborne pathogens
- Potential modes of transmission
- Risks of exposure to bloodborne pathogens
- Methods of controlling exposures
- Steps to take after bloodborne pathogen exposed
- OSHA regulations
- Q and A

### About the Trainer

#### Kimlee Lindgren, MS, CHST
