BLOODBORNE PATHOGENS TRAINING

Bloodborne pathogens are infectious microorganisms present in blood or potentially other bodily fluids that can cause disease/s in humans.

These pathogens include, but are not limited to, hepatitis B virus (HBV), hepatitis C (HCV), and human immunodeficiency virus (HIV).

These pathogens can expose workers to serious or life-threatening illnesses. This session will address the knowledge needed to recognize, evaluate, and control the potential exposures to bloodborne pathogens.

TOPICS

- Bloodborne pathogen vocabulary
- Types of bloodborne pathogens
- Potential modes of transmission
- Elements of a BBP Exposure Control Plan
- Risks of exposure to bloodborne pathogens
- Methods of controlling exposures
- Steps to take when exposed to bloodborne pathogens
- OSHA regulations
- Q and A

DATE & TIME

March 4, 2025
12:00 PM - 2:30 PM
Session Two
Lunch provided

LOCATION

Plymouth Town Hall
26 Court Street
Plymouth, MA 02360
