

Custodial Safety- What Municipal Leaders and Custodians Must Know

Join us on Wednesday, November 18th for a zoom presentation

9:00 a.m - 10:30 am

[Register here](#)

Please note in order to receive MIIA Rewards credits you must be in attendance for the entire session. If at all possible please keep your video on.

The Virus - What do we know now after 8 months of research?

- What is the viability of the virus in the built environment?
- What are the routes of transmission and the strategy to break the chain of transmission?

Proper use of Electrostatic Sprayers (no mister foggers – very briefly explain why):

- What are the safety precautions?
- How to determine what products can be used in this equipment?
- What related research is currently underway?

Know your Chemicals:

- What are the hazards and related precautions of the chemicals you are using?
Employer requirements to provide information and training under OSHA Hazard Communication standard.
- What are proper procedures to clean and disinfect?
- How to safety manage (store, monitor expiration, dispose) chemicals?

Work with your Vendor (have a list of questions to ask):

- What are the health and safety risks of the chemicals they are recommending?
- Are these products approved by the EPA for use in application equipment and for COVID-19?
- Can they provide safer alternatives (reference a few established lists of safer products based on EPA's List N for COVID-19)?
- Proper PPE
- Preparing to get in your vehicle and go home

Recommended audience:

Facility Directors, School Business Administrators, Asst. Town Managers & Town Managers.

Presenter: Lynn Rose,

Pollution Prevention and Environmental Health and Safety Consultant (EHS)
