

MIIA Cyber Liability Renewal

Thursday, February 24, 2022
1:00 p.m.- 2:00 p.m.
(virtual zoom training)

Today more than ever, cybersecurity is a major concern for municipalities. As a result of the increase in incidents across all enterprises, the cyber market is reducing capacity, limits, and coverage and seeing a dramatic increase in premiums. In order to ensure continuation of your cyber coverage it is important that you complete your renewal application. Susan Doucette Director, Program Underwriting - Tokio Marine Hcc Cyber & Professional Lines Group will review the application and answer questions during this upcoming webinar. Susan/Eric will also provide an overview of MIIA's CyberNet resources.

This webinar will address the following topics

- Walk-thru of the MIIA cyber liability renewal process
- Review of the MIIA CyberNET® Protection program application
- Question and answers

MIIA offers a number of resources to assist members with cybersecurity including a [resource library](#) and access to [MIIA CyberNet](#) MIIA's e-learning platform. We encourage you to check them out.
