MIIA members continue to look for ways to educate their workforce and help those who are still working remotely to remain productive. LocalGovU, MIIA's e-learning platform can provide a valuable resource to fill both of these needs. The platform, offers hundreds of online trainings which cover a range of topics from OSHA courses and Law Enforcement to Human Resources. Municipalities can designate administrators who are able to add users, assign training, and track training progress. Many of the courses are also eligible for MIIA Rewards credits.

On March 2, Ren Heitman, MIIA's LocalGovU customer service representative, will take us on a virtual tour of MIIA's e-Learning Platform. Ren will take a look at the virtual platform from both the administrator side and the training participant.

We hope you will be able to join us for this informative webinar!
