## **Speakers:**

### **Jay Kramarczyk, MS, PE, CFI**

#### ***Senior Principal Engineer-Mechanical & Fire Protection Engineering; District Manager-Northeast***

Mr. Kramarczyk is a Mechanical and Fire Protection Engineer and Certified Fire Investigator with EFI. He regularly performs forensic investigations/analyses of failures and consults with owners/municipalities/clients as to how to prevent failures or how to reconstruct following an incident. His areas of expertise include fire detection, alarms, and suppression/sprinklers, mechanical system analysis, fire-rated construction, and code interpretation as well as the investigation of fires and explosions. Within EFI Global he has technical oversight over the worldwide operation of Mechanical and Fire Protection Engineering and is the District Manager for the Northeast region. Mr. Kramarczyk regularly offers continuing education seminars nationwide and has testified in court as an expert witness numerous times in various jurisdictions.

### **Keith Pokorny, LEED AP**

#### ***Vice President, Environmental Services; Environmental Practice Leader***

Mr. Pokorny has over 30 years of experience in professional consulting services addressing environmental, engineering and construction management services. Responsibilities include the overall management of the U.S. Environmental practice for EFI. His duties include strategic planning, forecasting, recruiting, business development, and employee development. Mr. Pokorny has extensive experience managing a broad range of environmental and engineering projects for a variety of clients including, insurance companies, real estate investment/management firms, lenders, universities, hospitals and government entities. Specializing in large project coordination, he assists clients in implementing construction-related capital improvement programs.

### **Jennifer Archacki, LEED**

#### ***Environmental Service Line Principal***

Ms. Archacki has over 25 years of experience in the environmental and industrial hygiene consulting fields, Ms. Archacki is a seasoned environmental consultant specializing in asbestos/hazardous materials management for a broad range of clients. She is a Massachusetts-certified asbestos inspector, designer and management planner with extensive experience managing pre-demolition/renovation hazardous materials surveys, designing abatement specifications, overseeing large-scale abatement projects and providing regulatory consulting services. She is an experienced client manager, overseeing task order contracts for public and private sector clients throughout the northeast and has experience managing national clients with specific scope of work requirements for multi-site portfolios requiring coordination with numerous offices. With an extensive background serving public and private schools K-12, architectural/engineering firms, health care, academic, public utility and real estate sectors, she understands the importance of adding value through prompt response and budget control.

## **Sponsor:**

*EFI Global Inc. (EFI) is a full-service environmental consulting and engineering firm specializing in environmental consulting, hazardous materials management, forensic investigations, and specialty engineering services. EFI completes projects worldwide for a wide range of clients, including commercial, industrial, institutional, insurance, government/municipalities, public, and private entities. For more than 35 years, EFI Global has taken great pride in earning our clients' trust as a respected firm, capable of providing innovative, practical solutions to the most complex problems. Our multidisciplinary team of professionals are selected for their technical proficiency and in-depth industry knowledge to aid clients in resolving technical issues related to environmental consulting and engineering services.*
