

OSHA Certificate Program

OSHA# 7300 Understanding OSHA'S Permit Required Confined Space Standards

Tuesday, January 24, 2023
8:00 a.m. - 4:30 p.m.
Mandatory Orientation at 7:55 a.m

This training requires all participants to remain on camera the entire time.

COURSE DESCRIPTION

This course covers the requirements of the OSHA Permit-Required Confined Space Standards with respect to the 29 CFR 1910.146 (General Industry) and Subpart AA (Construction). Course topics include safety and health hazards associated with confined space entry, and the evaluation, prevention, and abatement of these hazards. The course covers OSHA requirements; it does not feature workshops (instrumentation, control methods, and testing) which are included in the OSHA course #2264 Permit-Required Confined Space Entry. OSHA 7300 is designed for small employers or a designated representative (line supervisor or manager) with the responsibility to develop a permit-required confined space program and for their workers to understand the concepts. Upon course completion students will have a basic understanding of confined space hazards, evaluating and abatement of the hazards, and determining when a confined space shall be classified as a permit-required confined space.

Who should attend: Safety Officers, Town Managers, and Department Heads or individuals designated with the responsibility to develop and maintain a safety and health program or system. This training is suitable for safety leaders, committee members, HR, and safety professionals responsible for improving the safety and health culture and best practices in their workplace.

Attendance at this seminar qualifies the MIIA member for 1% credit under the FY23 MIIA Rewards Workers' Compensation category.

Presenter

Lev Pobirsky is the Senior Director- Safety & Security for Pepsi-Cola National Brand Beverages. In his role, he provides safety security, and risk leadership to over 8,500 employees at over 40 manufacturing facilities, warehouses, and transportation depots across the United States. He is a certified OSHA General Industry & Construction outreach trainer and a Certified Health and Safety Manager, and a Certified Safety Professional.

Prior to corporate life, Mr. Pobirsky served as an Infantry & Special Operations Officer in the United States

Marine Corps, attaining the rank of Captain. He has worked and trained with various federal agencies on the topic of workplace violence and active shooter response.
