All you have to do is watch the news today to hear about some school safety breach. In 2018 alone, there have been 23 school shootings in the U.S., and we know such tragedies extend much further back to Columbine in 1999. While the world may have changed, the research is quite clear that one of the most effective ways to mitigate risk is to be prepared. In this webinar we'll explore the elements that comprise school safety – from hardware to communication to teamwork – as well as the elements of an effective crisis plan. Join us for this informative, empowering discussion on being ready in our schools.

Presented by your Employee Assistance Program, offered through AllOne Health
