

Preventing Slips, Trips and Falls

Almost one in every five work-related injuries result from a slip, trip or fall. Falls kill more than 12,000 people a year, about 1,200 of them at work. That makes the biggest cause of workplace fatalities after motor vehicle accidents. At MIIA, slips, trips and falls are our #1 cause of injury accounting for 31% of all MIIA workers' compensation losses and nearly 33 million dollars incurred over the past 5 years. Slips, trips and falls whether on or off the job are expensive, disruptive, painful and may be tragic.

There are many situations that can cause slips, trips and falls. Most slip, trip and fall injuries can be prevented by eliminating workplace hazards and by behavior modification: people taking the proper action to work safely.

What YOU Can Do To Prevent Slips, Trips and Falls

Wear footwear that is appropriate for the conditions inside and outside. On smooth or wet surfaces wear slip resistant soles. Avoid wearing high heels. On snowy, icy and rainy days wear boots to work and change after arriving.

Clean footwear of mud, snow, etc. when entering a building.

Be aware of changes in elevation and changes in walking surfaces. When moving from carpet to tile or dry tile to wet tile, etc. the friction (grip) between the sole of the shoe and floor surface lessens. Alter your stride to take shorter, slower steps.

Walk, don't run through work areas. When possible, stay on marked travel aisles and paths. Don't take "shortcuts" around machinery and equipment. Avoid areas that are cluttered or dimly lit.

When carrying a load make sure you can see over and around it. Scan the area ahead and plan your travel path. Get help to carry heavy or awkward objects. Use carts or other mechanical aids.

Clean up, correct, remove or report unsafe conditions such as spills, electric cords, frayed carpets, worn stairs and other hazards that could result in a slip/trip/fall injury. Warn others that a hazard exits by placing signs or cones or by isolation with caution tape or barricades.

What YOU Can Do To Prevent Slips, Trips and Falls, continued

Do not allow equipment, tools, materials or other obstacles to accumulate in aisles or walkways. Never store or place items on stairs.

Keep desk and file cabinet drawers closed when not being used or when unattended.

Always use a ladder or step stool. Never stand on a chair, desk, shelf, crate or box or any other unstable items to reach something. If you must routinely reach items in high locations, purchase a ladder or steps to allow it to be safely done.

Walk erect using even strides and good balance. Always use handrails when available.

Use "three point positioning" when entering or exiting trucks, equipment or construction vehicles. Maintain three points of attachment at all times; both hands and one foot or both feet and one hand. Enter **and** exit equipment facing it. Use all of the steps, **never** jump.

Maintain floors clean, free of water, oil or grease. Areas such as mechanics bays may be periodically steam cleaned. Tiled floors such as kitchens or school cafeterias that have been worn or filled smooth can de etched to restore a rougher surface.

Apply non-slip surfacing such as adhesive backed sheets, anti-slip paint, open-spaced grates or mats to ramps, docks, platforms or stairways recognized as hazardous.

Paint edges where elevation changes occur with "caution yellow" paint. Post signs to warn of dangerous areas.

During winter months remove snow and ice and apply sand and salt **before** employees come to work and frequently thereafter. Note areas that drain poorly, retain snow, or are habitually slippery, and initiate permanent changes (Engineer out) to eliminate the hazard.

Conduct periodic inspections of the property and grounds to identify and correct slip, trip and fall hazards. Consider hazards to employees **and** possible liability exposures for the public. Review interior and exterior walkways, stairs, handrails, pavement conditions, parking areas, lighting and all other hazards mentioned in this Training Tailgate.

Be Pro-active! Get Involved! Eliminate Slip, Trip and Fall Injuries!
